PROCESS FOR PRODUCTION OF A PLASTIC-COATED ALUMINUM  
FOIL AND PACKAGING MADE FROM THIS

In the Specification:

In accordance with 37 C.F.R. 1.121, please substitute for the original paragraph on page 1, lines 4 to 8, the following rewritten version of the paragraph on page 1, lines 4 to 8, as amended, and please insert the following new paragraph on page 1, line 9. The changes made are shown explicitly in the attached "Version With Markings To Show Changes Made".

Please substitute for the original paragraph on page 1, lines 4 to 8, for the following rewritten version of the paragraph on page 1, lines 4 to 8, as amended:

The invention concerns a process for production of an aluminum foil coated with a sealable and sterilizable plastic based on polypropylene (PP) or polyethylene (PE). The scope of the invention also includes packaging made from the coated aluminum foil and its use.

Please insert the following paragraph on page 1, line 9:

The temperature of the aluminum foil, with which the coextruded plastic and adhesion-promotion agent is being combined, is such that the temperature at the surface of the plastic coating and the adhesion-promotion agent lies below the crystallite melt point ( $T_K$ ) of the plastic.
